PeroxyChem to Increase Prices for Hydrogen Peroxide in the NAFTA Region

PHILADELPHIA, Pa. – June 22, 2015 – Effective immediately, or as contract terms permit, PeroxyChem is increasing prices in the NAFTA region for all grades of hydrogen peroxide. The amount of the price increase will be US\$0.05 per pound or CA\$135 per tonne. All price increase amounts are stated on a 100 percent basis.

This increase is necessary to mitigate the impact of increasing costs and to support capital investments in plant and distribution assets. High industry operating rates due to growing demand across broad market segments has led to high levels of asset utilization, stressing existing infrastructure. This price increase will help ensure the safe and reliable supply of hydrogen peroxide to our valued customers.

PeroxyChem's hydrogen peroxide energy and transportation fuel surcharges, as posted on its web page, will remain in effect. For current surcharge information please visit our website at www.peroxychem.com and choose Hydrogen Peroxide.

About PeroxyChem

PeroxyChem is a global leader in peroxygen and adjacent chemistries. The company employs approximately 600 people throughout the world, with facilities in North America, Europe and Asia. With an unyielding commitment to safety at its core and backed by an exceptional team, the company prides itself on exemplary customer service, product quality, reliability and technical service. PeroxyChem manufactures high quality products and wide ranging applications developed as a result of innovation and superior technical expertise. We provide customized chemistries for electronics, energy, environmental, food safety, pulp, paper, polymer, and other industrial and consumer markets. Visit PeroxyChem.com to learn more.
